ALD receives high sustainability scores in Vigeo Eiris extra-financial assessment

ALD is pleased to announce that it has been ranked among the top 3 companies within the business support services sector, following an extra-financial assessment by Vigeo Eiris. This assessment recognizes ALD's commitment and capacity to successfully implement environmental, social, governance (ESG) criteria into the company's strategy and every day operations.

Vigeo Eiris is an independent international extra-financial rating agency responsible for assessing and analyzing the sustainability risks and performance of companies according to over 330 ESG indicators. These performance indicators are becoming increasingly important for financial investors who are looking for a level of assurance relative to risk mitigation and sustainable value creation.

ALD received a global score of 67/100, qualifying in the 'Advanced' Level performance category and ranking 3 among the 102 companies in the Business Support Services sector panel worldwide.

ALD achieved solid results across all three pillars assessed: Environment (66/100), Social (72/100) and Governance (60/100).

In addition, ALD performed especially well in the following specific areas, obtaining scores equal or superior to 75/100:

- Fundamental Labor Rights
- Social Dialogue
- Career Management
- Corruption

"We are proud of these strong results which reward our continued efforts to ensure that environmental and social principles apply to all of our business activities globally on a daily basis," confirms Stephane Renie, Head of Corporate Social Responsibility. " This is a positive signal which encourages us to continue developing our sustainable strategies to have a positive long-term impact for our employees, clients, partners, shareholders and society as a whole."
